Portfolio: vetriselvan-pv.github.io/profile

Professional Summary

Senior Full Stack Engineer with 7+ years of experience building enterprise fintech platforms using Angular, Java Spring Boot, Node.js, and Nx Monorepos. Specialized in scalable frontend architecture, distributed frontend systems, secure API development, backend microservices, and configuration-driven enterprise applications for banking and BaaS products. Experienced leading cross-functional engineering teams and delivering international banking solutions across India and Jordan. Hands-on experience in backend development using Java Spring Boot across enterprise projects, along with cloud deployment and DevOps practices. Active open-source contributor and technical writer.

Key Achievements

- Reduced feature development effort by 40% through configuration-driven Angular architecture.
- Built reusable frontend libraries adopted across 5+ enterprise fintech teams.
- Led cross-functional engineering teams delivering scalable banking and BaaS platforms.
- Delivered international banking solutions for clients across India and Jordan.

Core Competencies

Angular Architecture • Full Stack Development • API Design • Micro Frontends • Fintech Systems • Technical Leadership • SDLC & Agile Practices • Code Quality & Best Practices • Mentoring

Technical Skills

Frontend	Angular (v8–v21), React, Next.js, Ionic Framework, RxJS, NGXS, HTML5, CSS3, SCSS, TypeScript, JavaScript (ES6+), Angular Material, Tailwind CSS, GSAP, d3.js
Backend	Java, Spring Boot, Node.js, Express.js, REST APIs, Microservices, Prisma ORM, Bcrypt Encryption, AES, Kafka, Redis
Architecture	Nx Monorepo, Module Federation, Native Federation, Micro Frontends, Angular Monorepo
Databases	PostgreSQL, MongoDB
Cloud & DevOps	Docker, CI/CD, GitHub Actions, Jenkins
Testing	Jest, Vitest
Version Control	Git, GitHub, GitLab
Tooling	VS Code, Cursor, Postman

Professional Experience

Intellect Design Arena LtdSept 2021 – Present

Chennai, India & Amman, Jordan

Project: FPX Library (Enterprise Fintech Design System)

Senior Frontend Architect / Project Lead

- Architected a scalable Angular-based UI framework and configuration-driven rendering engine to standardize application development across enterprise fintech products, reducing feature delivery time by **40%**.
- Built reusable Angular component libraries, shared services, and design-system modules that enabled multiple product teams to rapidly develop consistent, maintainable user interfaces while reducing duplicate development effort by **50%**.
- Led a team of **6 frontend engineers**, driving technical design, sprint planning, architecture decisions, code reviews, and mentoring to ensure high-quality software delivery.
- Established frontend engineering standards including Nx Monorepo practices, linting rules, CI/CD pipelines, and reusable coding patterns, improving code quality, maintainability, and deployment reliability.

Project: Pulse – BaaS Platform (API Monetization & Billing)

Senior Full Stack Engineer / Technical Lead

- Backend development for an enterprise Banking-as-a-Service (BaaS) platform, delivering scalable services for API monetization, subscription management, billing, and customer onboarding across multiple banking products.
- Designed and implemented high-performance REST APIs and business services using **Java Spring Boot** and **Node.js**, integrating authentication, authorisation, enterprise systems, and API gateway workflows.
- Developed scalable backend workflows for API usage tracking, pricing models, quota enforcement, subscription lifecycle, and automated billing, enabling reliable processing of enterprise API transactions.
- Built secure document management and specification upload services with role-based access control, ensuring compliance with API governance standards while improving operational efficiency.

Project: API Exchange – Consumer API Portal

Senior Full Stack Engineer / Technical Lead

- Led the development of an enterprise API marketplace platform that enabled developers to discover, subscribe to, and manage APIs through a scalable Angular-based self-service portal.
- Designed and implemented secure backend services using **Node.js** and **Java Spring Boot**, developing REST APIs, role-based access control (RBAC), authentication workflows, and business logic to support API lifecycle management.
- Integrated Angular applications with backend services to provide real-time API subscription, approval workflows, usage management, and seamless synchronization across distributed systems.
- Collaborated with cross-functional teams to define technical architecture, improve platform scalability, and deliver a secure, high-performance API developer experience.

Project: iTurmeric Studio (Low Code Platform)

Full Stack Engineer / Team Lead

- Mentored a 3-member frontend engineering team delivering a low-code Angular enterprise platform.
- Designed scalable Angular component libraries adopted across 5+ teams, reducing development effort by 50%.
- Conducted code reviews and enforced Angular architecture standards, folder structures, and quality gates.
- Developed secure internal APIs using Node.js and Express.js with Bcrypt encryption for automation workflows.

Project: Retail Banking Hybrid Mobile & Back-Office Applications

Consultant

- Developed a retail banking hybrid mobile application using Angular 14, Ionic, and Apache Cordova.
- Integrated native Cordova plugins and optimized UI interactions using GSAP animations.
- Contributed to enterprise back-office banking applications including Service Request Management and Role Maintenance modules.

Project: Arab Bank Teller Application (On-site - Jordan)

Associate Consultant

- Built Angular 8 teller applications featuring reusable UI components for bill payment workflows.
- Collaborated directly with on-site clients and domain experts to gather requirements and deliver enhancements.

Project: Sberbank Retail Mobile & Web Application

Associate Consultant

- Independently developed Service Request, Flex Pay, Onboarding, and Greenification modules using Angular and Java Spring Boot backend systems.
- Developed and maintained backend APIs using Spring Boot to support enterprise banking workflows and integrations.

Newage Software & Solutions

Nov 2019 – Sept 2021

Chennai, India

Project: ERP Logistics & CRM Hybrid App

Software Developer

- Developed ERP logistics modules using Angular 9 with Nx workspace architecture and NGXS state management.
- Built backend services and REST APIs using Java Spring Boot for logistics and CRM workflows.
- Participated in stakeholder grooming sessions, technical discussions, and requirement analysis.

Open Source Contributions

Open Source Contributor — AnalogJS Ecosystem

2026 – Present

Contributing Angular architecture patterns and developer tooling enhancements for modern frontend applications.

github.com/analogjs/angular-skills

Publications & Technical Writing

Technical Blog Writer — Medium & Dev.to

2021 – Present

Authoring articles on Full Stack Development, Angular performance optimization, scalable frontend architecture, and deployment best practices. medium.com/@vetriselvan_11 | dev.to/vetriselvan_11

Awards & Recognition

- Sergey Bubka Award – Best Product Engineer (2023)
- Spotlight Award (2022)
- Ace Developer Award (2021)
- Rockstar Rookie Award (2020)

Education

Bachelor of Engineering in Mechanical Engineering

May 2018

Mookambigai College of Engineering, Anna University

Tiruchirapalli, India

Languages

-
- English — Professional Proficiency
 - Tamil — Native Proficiency

Availability

- Notice Period: Serving Notice Period (30 Days)
- Open to Remote, Hybrid, and On-site Opportunities
- Open to Visa Sponsorship and International Relocation
